Subject: Exceptional event question

Hi Richard,

I have another question related to exceptional events. Are we required to post event submittals on our website after the public comment period and if so for how long? I couldn't find anything about this in the rule. We currently have all of the exceptional events we have ever submitted posted on our webpage

(https://www.colorado.gov/airquality/tech_doc_repository.aspx#exceptional_events) but we are trying to move away from having PDFs posted on our webpages so we are looking at taking some of them off. Would it be appropriate to just house the most recent couple years on our webpage but retain copies of the others elsewhere? If you could let me know I would appreciate it.

Thanks,

Ingrid Hewitson, MPH
